Experience

•Twarus *Vilnius, Lithuania*

January 2025 - Present

- **Founding Engineer**: Developed an agentic AI Sustainability Consultant that automates reporting, streamlines compliance checks, and generates professional sustainability reports for any framework. Built with a React frontend, C# backend, Python AI agent and a DevOps pipeline on Google Cloud.
  Secured a €77,000 grant to take Twarus to market. Check it out at *twarus.com*

•Danske Bank *Vilnius, Lithuania*

July 2025 - Present

- **Cloud Software Engineer**: International payments.

•Thermo Fisher Scientific *Eindhoven, Netherlands*

January 2025 - June 2025

- **R&D Engineer**: Working on research and development for TEM and STEM microscopes, focusing on semiconductor applications. Contributing to the innovation of automation, imaging, and analysis systems.

•WeHeat *Duizel, Netherlands*

October 2023 - January 2025

- **Embedded Firmware (August 2024 - January 2025)**: Developed and optimized firmware for heat pump systems, focusing on communication protocols (STK500, ProtoBuf, MQTT) using C, C++, Assembly, and ARM-based STM microcontrollers.
- **Backend Development (November 2023 - August 2024)**: Contributed to backend development using C# .NET, MongoDB, PostgreSQL, and Docker, ensuring seamless integration between firmware and software.

•SensUs Biosensor Development Competition *Eindhoven University of Technology, Netherlands - Honors program*

August 2022 - March 2024

- **Chair (September 2023 – March 2024)**: Directed the competition's organization, coordinating efforts across multiple teams and departments.
- **Technology Department Member (August 2022 – September 2023)**: Played a key role in developing and implementing the technical infrastructure.

Education

•Bachelor of Science in Computer Science and Engineering *2021-2024*
Eindhoven University of Technology (QS World Ranking top 60) Graduated with Honors

•Iacocca Global Village Program *May 2022 - November 2022*
Lehigh University Certificate

•Future Leaders Exchange (FLEX) Program *2019-2020*
U.S. Department of State Certificate

Achievements

•3rd Place Lithuanian Olympiad in Informatics *2019*

•3rd Place Lithuanian Olympiad in Informatics (Age Group) *2018*

•Represented Lithuania European Junior Olympiad in Informatics *2018*

Skills

Languages: English, Lithuanian (native), Russian (second native), Ukrainian (professional working)
Soft Skills: Leadership, Problem Solving, Adaptability

Hobbies

Passionate about autonomous systems, I've created intelligent driving software for vehicles, self-plowing tractors, and quadcopters—integrating cameras and microcontrollers. Running is my daily ritual, keeping me focused and energized.
